DAWIT T HAILE
1704 Central Avenue | Alameda, CA | (510) 631-5042 | LinkedIn | dawit.haile@hotmail.com
Data Scientist-Machine Learning Engineer

PROFILE

- Experienced Machine Learning Engineer with a strong background in programming, machine learning predictive modeling algorithms and data insights looking to be a part of a team with an innovative, creative and fast-paced work culture.
- Explore data, prepare and preprocessing data, analyze data, evaluate algorithms, improve results using algorithms tuning, finalize the model, make predictions and present the results.
- Strong knowledge in machine learning, statistical learnings, and data analytics. Fun with positive attitude and team player, focus during high-pressure, deadline-driven environments and willing to learn new technologies.

KEY SKILLS

Programming Languages: Python, Java, R
Visualization Tools: R(ggplot) & Python packages(matplotlib, seaborn), D3.js, Tableau
Databases: RDBMS (MySQL, Oracle), Graph database (Neo4j), NoSQL
Cloud Computing: Amazon Web Services (AWS)
Big Data Technology: Apache Hadoop, Hive, Pig
Scripting Language: JavaScript, HTML5, CSS
Platforms: Strong in Linux (RedHat, Ubuntu), Unix (Mac OS), MS Windows
Others: CRM, A/B Testing, Bootstrap, NLP (text analysis), SDLC **(**Waterfall, Agile (SCRUM))

PROFESSIONAL EXPERIENCE

GENERAL ASSEMBLY **July 2017- Present**
Data Scientist- Machine Learning Engineer - Fellowship San Francisco, CA

- Develop and apply machine learning predictive models to massive data sets in fields like finance, healthcare, education, music and text analysis

TOGIS UAB Ltd **September 2015 - June 2016**
Data Analytics Engineer Vilnius, Lithuania
A company mainly working on data analytics, software development system, information provision and research.

- Build a model by investigated factors that affect the likelihood of charity donations being made based on real census data. Trained and tested several supervised machine learning models on preprocessed census data to predict the likelihood of donations. Selected the best model based on accuracy and algorithm efficiency.
- Build a model using machine learning predictive modelling algorithms to identify and reporting the causes of flight delays and cancellations.
- Wrote python scripts to implement constraint-based data cleaning and preprocessing such as imputing missing values, removing correlated features, data normalization and feature selection.
- Performed scientific research on the analysis of Pareto-front for multi-objective optimization functions using (NSGA-II) genetic algorithm and clustering (k-means) techniques of machine learning algorithms.

MINISTRY OF EDUCATION, ERITREA **August 2011 - June 2014**
Software Engineer and Analyst Asmara, Eritrea
It's a governmental head office of Ministry Education of Eritrea

- Build models by analyzing the behavior and performance patterns of the students whether the student get scholarship for his undergraduate studies or not
- Conducted analysis for implementation of educational strategies, leading to 31% growth in high-school graduates

- Played central role in database design including tables, stored procedures, views, triggers, rules, defaults, user defined data types, functions and system administration for the Ministry of Education
- Collaborated on a team project to design and implement the Library Management System comprising all functions involved in managing books, users, staff and administration. Developed additional features including an automated book penalty fee calculator and a printing mechanism for user and library records.

EDUCATION & CERTIFICATIONS

Machine Learning Engineer **July 2017- Present**
Udacity by Kaggle San Francisco, CA

Master of Science- Computer Modeling **September 2014-June 2016**
Vilnius University Vilnius, Lithuania

Bachelor of Science- Computer Science **September 2006-July 2011**
Eritrea Institute of Technology (EIT) Mai-Nefhi, Eritrea
Equivalent to U.S Bachelor's degree in the field from accredited institution, World Education Service (NYC)

Coursera-Certification **October 2016- May 2017**
Data Scientist's Toolbox, A Crash Course in Data Science, R Programming
John Hopkins University

Machine Learning Specialization, Regression, Classification, Clustering and Retrieval
University of Washington

AWARDS

Masters Scholarship Award **2014-2016**
Erasmus Mundus Action-II KITE
